The Academy of Beauty and Aesthetics Ltd (TABA UK)

Learn New...Develop More...

About us

Here at The Academy of Beauty and Aesthetics Ltd (TABA UK) we pride ourselves on providing quality training in beauty, aesthetics and SPMU.

Opening our doors at the beginning of 2019, the academy has become one of the fastest growing academies in the UK, with student numbers already in the hundreds. Since inception we have maintained and continue to maintain our 5-star review status.

We offer training to both medic and non-medic students wishing to enter the world of aesthetic treatments. We are one of few academies able to offer a true fast track course in aesthetics, which then enables students to obtain insurance.

All our courses are accredited by some of the most recognisable accreditation bodies in the industry, allowing our students to easily gain insurance on completion.

Our expert tutors are highly trained and resourceful with numerous years of teaching experience between them. They are continuously looking for ways

to develop and maintain high standards of training to ensure students are always at the forefront of the industry.

We ensure all students gain the essential theory, knowledge and understanding, as well as extensive practical experience in order to safely and successfully progress with their new skills and careers. We offer exceptional aftercare support for all students to assist them in all stages of their careers within the beauty and aesthetics industry.

Why Choose TABA UK:

We will always go above and beyond for our students. We pride ourselves in offering exceptionally high-quality training with a key focus of health and safety. We ensure all our students leave feeling confident, safe and competent in their new skills. However, our training does not just end when your course finishes. We will continue to support you with our unlimited aftercare program which allows all students to have direct means of contact regardless of whether it is a weekday or weekend. Don't take our word for it... See our reviews at: www.facebook.com/

Why choose TABA UK?

We go above and beyond for our students. We are not content until our students leave through our doors with the skills, knowledge, and confidence that it takes to carry out treatments and procedures to a safe and high level of quality.

We want every student to leave us feeling like they really have made the right choice when training at TABA UK. Our training doesn't just end when your course finishes. We will continue to support you, and we have direct means of contact for all our students regardless of whether it's a weekday or weekend.

Don't take our word for it. See our reviews at: <https://web.facebook.com/tabauk/reviews/>

Reviews

Feedback from our students is very important to us, its not something we hide from and fully embrace what people want from our training programmes. We actively encourage reviews so that prospective students can read and understand why we are the UK's leading training provider.

TABA - The Academy of Beauty and Aesthetics
1 February

I completed my training here over a year ago and I am so pleased I did. Even after a year Jane and the team remain friendly and so supportive if I get in touch. They always reply to messages. The support group you join after the training is great too!

I have been back and had my brows done today and the skills and knowledge of the students and the support they get during the practical training is second to none. Thank you so much.

TABA - The Academy of Beauty and Aesthetics
September 2021

Fantastic training academy. Just completed my non medic dermal fillers and botox training and was so impressed by the training I received. Adam is a top class trainer and so knowledgeable. Unlike so many other training providers out there TABA care about the quality of training it provides and not just about taking your money. So if your looking to be trained at the highest level then book on a course with TABA.

December 17

I highly recommend the training with TABA. Having complete the fast track I have nothing to say but absolute professionals. Passing through all the different courses, I've met an amazing people my lovely tutors Louise, Jane , Victoria, who I would like to thank for being so helpful and patient with all of us.

**April Kate**

Recommends The Academy of Beauty and Aesthetic
16 December

I cannot thank TABA enough for their support over the last week. I've got one day left of my fast track to aesthetics course and it has been absolutely brilliant from start to finish. I'm gutted it's the last day as I've had the best time at TABA! The tutors, staff & models have all been brilliant - they cannot do enough for you. Especially Jo, Vic & Jane! Thank you so much for being so welcoming, easing my nerves & providing me with more knowledge than I thought possible for someone new to the industry. I feel confident about my new qualifications & skills and that's completely down to the tutors at the academy. It's been an absolute pleasure training with TABA and I cannot wait to book more courses! Xxx

Can't wait to book on to the advanced courses.

**Sarah-jane Hannon**

December 17

I had pleasure of spending a week with TABA and I have to say I will be back many times over . The best thing was that they make you so relaxed and I felt part of the TABA family.

Jane was amazing and I didn't want to leave , but that's the thing I will always be part of the TABA family as they support you even when you leave . If you looking for somewhere to get the best out of you then this is the place.

I have come away with lots of qualifications but so much more, confidence to change my future and so many more friends.

Thank you Jane and team, I can't thank you enough.

**Kaylee Wiberg**

Recommends The Academy of Beauty and Aesthetics
December 12

Recently completed my medic combined dermal fillers and anti wrinkle injections course. Cannot thank the academy enough, especially my course tutor Louise. I have received amazing, in-depth guidance and training from Louise and continuous ongoing support. I would highly recommend the academy as the training I attended has been outstanding.

**Kishan Sheth**

Recommends The Academy of Beauty and Aesthetics.
December 8

As a beginner in aesthetic medicine, it has become very apparent how the wide spectrum of treatments has allowed us to take care of our patients and clients with more predictability and risk minimisation than ever before.

I was very impressed with how comprehensively laid out the training sessions were, and had Jane and Joanne as my instructors over two days. Both were brilliant and made sure the key areas were highlighted and continuously linked this back to clinical relevance in our field of practice. Thanks again TABA for a very useful course, covering key topics in a concise way.

**Estee Louise**

Recommends The Academy of Beauty and Aesthetics.
October 19

I really enjoyed the beginners Microblading course, I found it very informative and Jane was amazing throughout, super helpful especially during the live model stage. I love that we are part of a WhatsApp group for ongoing help and support, this is extremely helpful. Overall fantastic experience at TABA!

**Nicola Ellis**

Recommends The Academy of Beauty and Aesthetics.
October 18

I did the Ultimate Dermal Fillers training with Adam. It was a fantastic course. I gained lots more experience and got to work on a lot of models. Adam was a fantastic trainer. The training school was very professional. Everyone made me feel very welcome. I feel very confident doing advanced fillers at my clinic. I would definitely recommend The Academy of Beauty and Aesthetics.

Partnerships

In order to reach and continue with our successful path, we have made some partnerships with some reputable companies in order to assist our students in the path going forwards. Our partnerships include accreditations, insurance, finance, pharmaceutical supplies, and social media experts. These combined create opportunities for all our students to have access to information and services to help with their journeys going forward.

Advanced Dermal Fillers

Entry Requirements

This course is designed for students who have a certified qualification in Dermal Fillers at a foundation level or higher.

Course Overview

Our Advanced Dermal Filler course is taught by our Advanced Nurse Practitioner and has been structured from start to finish with you in mind, to assure that when you complete your training, you will leave with the specialist skills to perform Dermal Fillers to the advanced areas of the face.

The course covers the anatomy and physiology of the skin to ensure you have the knowledge and understanding of human related mechanisms that could have some involvement in the process of these treatments, and in order to aid in your knowledge of the procedures in Dermal Fillers.

You will gain practical experience both in the classroom and working on live models.

Course Content

- Background of Dermal Fillers
- Hyaluronic Acid
- Anatomy and physiology
- Anatomy of the face
- Contraindications
- Consultation process
- Client selection
- Pain management
- Adverse effects
- Complications management
- Anaphylaxis
- Hyaluronidase
- After care
- Health and safety
- Needle stick injury protocol
- Legalities
- Insurance
- Business advice
- Costs and profit
- Emergency Kit advice
- Live demonstrations
- Live model experience

Which areas are covered?

- Cheeks
- Peri Oral Lines
- Marionette Lines
- Naso Labial Folds
- Jawline
- Chin
- Cannula Technique

Accreditations/Certifications and Assessment

- Pre-Study
- Theory Assessment
- Practical Assessment
- CPD Certification Service
- CPD Accreditation Group
- Certification provided on successful completion of the course

Course Duration: 1 day + Pre-Study

Course Price: £1199 Inc VAT

Ultimate Dermal Fillers

Entry Requirements

This course is designed for students who have a certified qualification in Dermal Fillers at a foundation level or higher.

Course Overview

Our Ultimate Dermal Filler course is taught by our Advanced Nurse Practitioner and has been structured from start to finish with you in mind, to assure that when you complete your training, you will leave with the specialist skills to perform Dermal Fillers in the advanced areas of the face. In addition you will also learn about and certify in Prohilo.

The course covers the anatomy and physiology of the skin to ensure you have the knowledge and understanding of human related mechanisms that could have some involvement in the process of these treatments, and in order to aid in your knowledge of the procedures in Dermal Fillers.

You will gain practical experience both in the classroom and working on live models.

Course Content

- Background of Dermal Fillers
- Hyaluronic Acid
- Anatomy and physiology
- Anatomy of the face
- Contraindications
- Consultation process
- Client selection
- Pain management
- Adverse effects
- Complications management
- Anaphylaxis
- Hyaluronidase

- Live model experience
- Background of Prohilo
- Bap technique and treatment areas

Which areas are covered?

Dermal Fillers

- Cheeks
- Peri Oral Lines
- Marionette Lines
- Naso Labial Folds
- Jawline
- Chin
- Cannula Technique
- Liquid Rhinoplasty
- Tear Troughs

Prohilo

- The face
- Neck
- Décolletage
- Hands
- Inner arms

Accreditations/Certifications and Assessment

- Pre-Study
- Theory Assessment
- Practical Assessment
- CPD Certification Service
- CPD Accreditation Group
- Certification provided on successful completion of the course

Course Duration: 2 day + Pre-Study

Course Price: £1999 Inc VAT

Advanced Anti-wrinkle Injections

Entry Requirements

This course is designed for students who have a certified qualification in Anti-wrinkle Injections at a foundation level or higher.

Course Overview

Our Advanced Anti-Wrinkle Injections course is taught by our Advanced Nurse Practitioner and has been structured from start to finish with you in mind, to assure that when you complete your training, you will leave with the specialist skills to perform Anti-wrinkle Injections to the advanced areas of the face.

The course covers the anatomy and physiology of the skin to ensure you have the knowledge and understanding of human related mechanisms that could have some involvement in the process of these treatments, and in order to aid in your knowledge of the procedures in Dermal Fillers.

You will gain practical experience both in the classroom and working on live models.

Course Content

- Background of Botulinum Toxin
- Anatomy and Physiology
- Muscles of the face
- Contraindications
- Consultation process
- Client selection
- Adverse effects
- Anaphylaxis
- After care
- Health and safety
- Needle stick injury protocol

Vitamin B12

Entry Requirements

This course is designed for students who have one of the following: Level 3 NVQ in beauty or equivalent, 6 months experience in a skin invasive treatment such as microblading, microneedling, SPMU or a current injectables qualification.

If you don't have any of the above, we do offer a fasttrack pathway course which can be seen on page 37

Course Overview

Our Vitamin B12 course is taught by our Advanced Nurse Practitioner and has been structured from start to finish with you in mind, to assure that when you complete your training, you will leave with the specialist skills that will help you feel confident to perform Vitamin B12 procedures.

The course covers the anatomy and physiology of the skin to ensure you have the knowledge and understanding of human related mechanisms that could have some involvement in the process of these treatments, and in order to aid in your knowledge of the procedures in Vitamin B12.

Vitamin B12 injections are used to prevent or treat a deficiency. The injections are administered intramuscular, or into muscle. Vitamin B12 injections have become very popular in recent years as busy lifestyles often lead to poor diet and deficiency. Vitamin B12 injections often result in an energised more balanced state of being.

You will gain practical experience both in the classroom and working on live models.

Course Content

- Health & Safety
- Client Consultation
- Anatomy and Physiology
- Insurance
- Vit B12 and its effects on the body
- Pre and post treatment procedures
- Pain Management
- Practice work
- Needle stick injuries
- Anaphylaxis
- Risk and Side Affects

- Client Suitability
- Advantages of Treatment
- Live Demonstrations
- Live Model Experience
- Business Setup
- Aftercare

Accreditations/Certifications and Assessment

- Pre-Study
- Theory Assessment
- Practical Assessment
- CPD Accreditation Group
- Certification provided on successful completion of the course

Course Duration: 1 day + Pre-Study

Course Price: £399 Inc VAT

Ultimate Skin Booster

Our Skin Booster Course includes both Profhilo and Sunekos techniques to allow you to meet all clients needs. The course is taught by our advanced Nurse Practitioner and has been structured from start to finish with you in mind, to assure that when you complete your training, you will leave with the specialist skills that will help you feel confident to perform both Profhilo and Sunekos procedures.

The course covers the anatomy and physiology of the skin to ensure you have the knowledge and understanding of human related mechanisms that could have some involvement in the process of these treatments, and in order to aid in your knowledge of the procedures in Profhilo and Sunekos. You will be taught about how the treatments can be used to target specific skin complaints on numerous areas of the face and body. You will learn how to use both Sunekos 200 and Sunekos 1200 to treat areas and client's areas of concern most effectively.

You will gain practical experience both in the classroom and working on live models.

Course Content

- Background of Profhilo
- Background of Sunekos
- Hyaluronic Acid
- Anatomy and physiology
- Anatomy of the skin
- Skin ageing
- Treatment areas
- Advantages of treatment
- Contraindications
- Consultation process

Course Duration: 1 day + Pre-Study

Course Price: £899 Inc VAT

SKIN REJUVENATION COURSES

Ultimate Skincare

Our Ultimate Skincare course is a combination of three different courses (Microneedling, Dermaplaning & Chemical Peels) and comprises of both theory and practical elements, and has been structured from start to finish with you in mind, to assure that when you complete your training, you will leave with the specialist skills that will help you feel confident to perform these three procedures.

You will gain practical experience both in the classroom and working on live models.

Course content

- Anatomy and Physiology of the skin
- Health and Safety
- Q&A and Certification
- Live Demonstration
- Live model experience
- Business Setup
- Aftercare & Post Treatment Advice
- Consultation processes

Dermaplaning

- Dermaplaning & the Benefits
- Skin Conditions & Contra-indications

- Consultation & Pre-dermaplane Advice
- Skincare & Combination Treatments

Microneedling

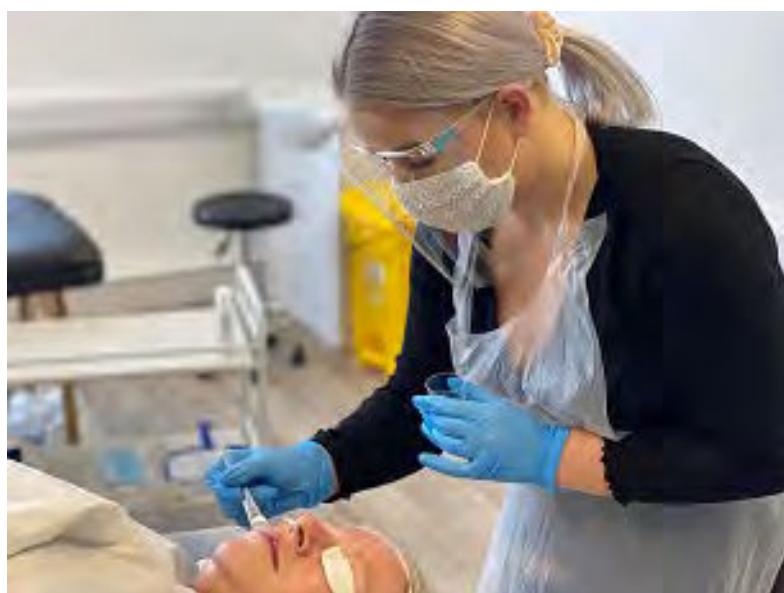

- What is skin needling and how does it work?
- Treatable skin conditions
- Use of Meso Therapy
- Products and ingredients used during treatment
- The difference between microneedling with device and roller and which is most suitable for your client
- Microneedling & the Benefits
- Skin Conditions & Contra-indications
- Consultation & Microneedling Advice

Chemical Peels

- Treatable skin conditions
- Products and ingredients used during treatment
- Peels & the Benefits
- Skin Conditions & Contra-indications
- Consultation & Pre-peel Advice

Course Duration: 1 day 1 day + pre-study

Course Price: £749 Inc VAT

Plasma Fibroblast

Entry Requirements

No previous experience is required. Whether you are a permanent makeup artist or a complete novice, we will give you all the training you need to become a successful Plasma Fibroblast practitioner.

Course Overview

Our Plasma Fibroblast course comprises of both theory and practical elements on Plasma skin techniques, and has been structured from start to finish with you in mind, to assure that when you complete your training, you will leave with the specialist skills that will help you feel confident to perform Plasma Fibroblast procedures.

You will gain practical experience both in the classroom and working on live models.

Course Content

- Anatomy and Physiology of the skin
- Health and Safety
- Non-surgical skin tightening and lifting, including reduction of lines and wrinkles
- Non-surgical blepharoplasty (eye lid correction)
 - including tightening baggy lower eyelids and excess upper eyelid skin
- Skin tag and mole removal
- Effective and safe acne improvement
- Pigmentation reduction
- Skin regeneration
- Skin tightening for face and neck lifting
- Specialised for wrinkle reduction
- Reduce the appearance of stretch marks and scarring
- Boost the transdermal absorption of skincare ingredients
- Full consultation process
- Live model experience
- Business Setup
- Aftercare

Hifu Face and Body

A high intensity focused ultrasound facial (HIFU), a non-invasive treatment for facial aging and face and body skin tightening. This treatment provides some of the benefits of a facelift without the need for surgery or the downtime.

A HIFU facial uses ultrasound to create heat at a deep level in the skin. This heat damages targeted skin cells, causing the body to stimulate a healing response.

To do this, the body produces collagen to aid in cell regrowth. Collagen is a substance in the skin that gives it structure and elasticity in turn reducing fine lines and wrinkles.

HIFU is dramatically effective in the following areas of concern:

- Tightening the skin on the neck
- Reducing the appearance of jowls
- Lifting drooping eyelids or eyebrows
- Smoothing wrinkles on the face
- Smoothing and tightening lose skin on other areas if the body such as tummy, arms, thighs etc.

Course content

- How to safely consult your client
- Contraindications
- How to perform the treatment
- Facial treatment
- Body treatment
- Live model experience
- Aftercare

HIFU can also be used for Vaginal Rejuvenation, machines have probes to complete both body and face as well as vaginal treatments. The Vaginal Rejuvenation training can be completed as a separate course.

Course Duration: 1 day

Course Price: £749 Inc VAT Excluding Machine
£2149 Inc VAT Including Machine

Vaginal Hifu

HIFU stands for 'High Intensity Focused Ultrasound.'

HIFU treatments target various depths of the body's tissue for skin tightening, skin lifting and body contouring. This non-invasive treatment works by targeting the skins layers to stimulate collagen and elastin production as well as focusing on the muscular layers, which most other treatments are unable to reach.

HIFU Vaginal treatment has become one of the most sought after treatments for tightening of the vagina on a superficial and/or muscular level for a number of beneficial reasons.

The vaginal tightening HIFU system uses non-invasive ultrasonic focusing technique to focus on the mucous membrane and fibrous layer and muscle layer directly. Using high intensity ultrasonic waves as the energy source it penetrates to the required layer of tissue causing micro injury to the deeper layers to stimulate collagen and elastin production (which in turn leads to tighter more youthful skin) whilst the outer tissue is left undamaged. This therefore means there is little to no downtime or sensitivity following treatment, with some results being detected instantly.

Course content

During training students will learn all about the theory elements of HIFU, how it works and what benefits it can have for their client. These include:

- Increasing vaginal moisture
- Increasing sensitivity during sexual activity
- Improving vaginal tightness and firmness
- Stress incontinence is reduced and improved
- Improves, firms & tightens muscles in the treated area
- Reduction / elimination of vaginal bacterial infections
- Helps treat signs of aging and offers an overall rejuvenation for the vagina
- Clinically proven safe and effective
- Cost effective alternative to surgical operation
- No need for anaesthesia or sedation
- No incisions or risk of infection
- No Downtime

- Results can be noticed after just 1 treatment

Students will also learn:

- How to consult their client
- Contraindications
- Pre procedure and aftercare for their clients
- Machine use and settings
- Product/treatment cost and pricing
- Health and safety
- Anatomy and physiology relating to the areas being treated

Course Duration: 1 day

Course Price: £749 Inc VAT Excluding Machine
£2149 Inc VAT Including Machine

HIFU FACE, BODY, & VAGINAL

Course Price: £1199

Fast Track Pathway to Injectables

Entry Requirements

This course is designed for students with no previous skin invasive or medical experience who wish to gain qualification in injectables.

Course Overview

Due to insurance stipulations students are normally required to have one of the following to be able to qualify in injectables:

- Beauty Level 3 NVQ
- 6 months experience in a skin invasive treatment
- Registered with a medical body

We are one of few academies in the U.K. able to offer a fast track to injectables with guaranteed insurance for our students. We have gained this privilege due to our high quality training and dedication to safety and advanced anatomy and physiology content within our courses.

Our Fast Track Pathway to Injectables course is taught by our Advanced Nurse Practitioner and has been designed in such a way to ensure all students are able to perform injectables in a safe and effective manner with in-depth understanding of health and safety, contradictions, complications, first aid and much more.

The course covers in-depth anatomy and physiology of the skin and face both during your time at the academy and in pre study material.

Course Content

- Microneedling
- Microblading
- Chemical Peels
- Dermaplaning
- Anatomy and Physiology
- Dermal fillers
- Anti Wrinkle Injections

Accreditations/Certifications and Assessment

- Pre-Study
- Theory Assessment
- Practical Assessment
- CPD Accreditation Group
- CPD Certification Service
- Certification provided on successful completion of the course

Course Duration

- The package which includes all of the pathway elements and Dermal Fillers is a 5 day course.
- The package which includes all of the pathway elements as well as Dermal Fillers and Anti Wrinkle Injections is a 6 day course.
- 5 to 6 days depending on choice + Pre Study

Course Price: 5 days Package £3899 inc vat
(Dermal Fillers Only)

6 days Package £4399 inc vat Dermal Fillers and Anti-wrinkle Injections

A photograph of a woman from the waist up, sitting on a light-colored couch. She is wearing a white, ribbed, short-sleeved top and blue jeans. Her right hand rests on her hip, and she is looking down at her abdomen. The background is a plain, light-colored wall.

FAT LOSS

Body Sculpting Ultrasonic Cavitation with RF

What is Ultrasonic Cavitation?

Ultrasonic cavitation is also referred to as ultrasonic lipolysis. This is a treatment to create body contouring by removing fat deposits under your skin. This treatment has also proven to improve skin elasticity resulting in a tightening effect.

This procedure is a safer alternative to surgical options, such as like liposuction, as no invasive element to the procedure is required. The treatment uses ultrasonic radio waves to break apart fat cells, which are then flushed out through your lymphatic system.

With results noticeable after just 1 treatment this proves to be a very popular fat loss procedure.

Ultrasonic Cavitation can be used on the following areas:

- Abdomen
- Buttocks
- Arms
- Inner and Outer Thighs
- Love Handles

What is Radio Frequency?

Radio Frequency is a well regarded treatment for its versatility and effectiveness. It helps to stimulate collagen production as well as tightening the elastic fibres providing effective skin tightening.

Radio frequency can be used on the face, neck and décolletage to tighten and contour. Radio Frequency is also capable of tightening and contouring the body, reduce fat and treat cellulite.

Course Content:

- What is Ultrasonic Cavitation and RF and how do they work?
- Benefits of Ultrasonic Cavitation and RF including fat reduction and skin tightening
- Anatomy and Physiology related to Ultrasonic Cavitation and RF
- Understanding Fat Cells
- Client consultation

- Pre and post treatment advice
- Contraindications
- Treatment contra-actions
- Treatment process including live model experience for cavitation
- Experience with both body and facial treatments for RF
- Machine maintenance

Course Duration: 1 day + Pre-Study

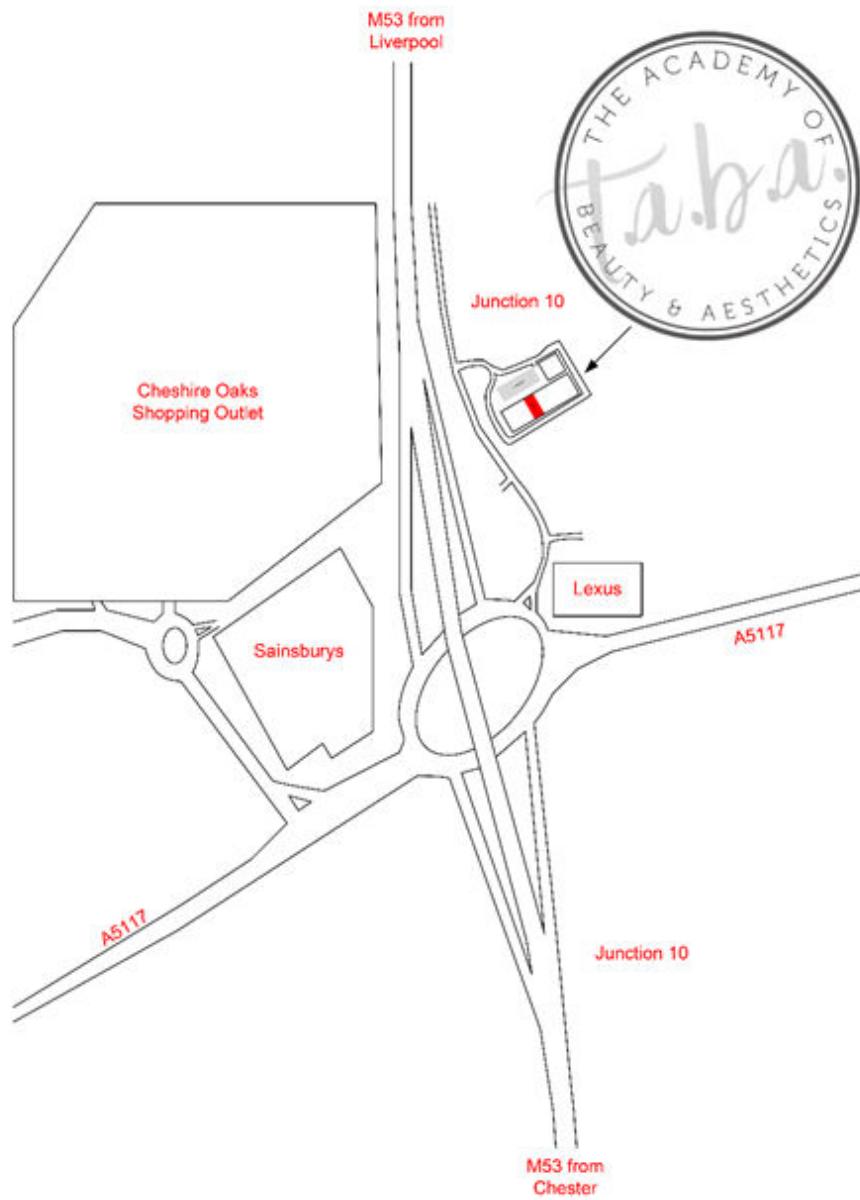

Course Price: £699 Inc VAT Excluding Machine
£1199 Inc VAT Including Machine

Location

We are based on the outskirts of Chester, next to the UK's largest outdoor clothes shopping outlet (Cheshire Oaks).

We are 10 mins drive/taxi from Chester train station and conveniently placed right next to all the main motorway links (just off the M53 & M56).
